If the electronic key does not operate properly

Unlocking and locking the doors
To unlock or lock the vehicle, use the mechanical key to remove the lock cover on the driver's door handle. The mechanical key is stored inside the electronic key.

1. Locks all the doors
2. Closes the windows and moon roof (turn and hold)
3. Unlocks the door
   Turning the key rearward unlocks the driver's door. Turning the key once again unlocks the other doors.
4. Opens the windows and moon roof (turn and hold)

Unlocking the trunk
Turn the mechanical key clockwise to open.

Starting the hybrid system

CLY72BB021
1. Ensure that the shift lever is in P and depress the brake pedal.
2. Touch the Lexus emblem side of the electronic key to the power switch.
   If any of the doors is opened or closed after the key was touched to the switch to start the vehicle, an alarm will sound to indicate that the start function cannot detect the key.
3. Press the power switch within 10 seconds of the buzzer sounding, keeping the brake pedal depressed.

In the event that the hybrid system still cannot be started, contact your Lexus dealer.

If the electronic key battery is depleted, a warning message will be shown on the multi-information display. Replace the battery with a new one. For instructions on replacing the battery, refer to the "Owner's Manual". If you need further assistance, contact your Lexus dealer.

If the hybrid system does not start

Make sure that the correct operating procedures have been followed.

Brake pedal

Make sure that the brake pedal is firmly depressed when attempting to start the hybrid system. (→P.36)

If the hybrid system still does not start, see the "Owner's Manual" for more information or contact your Lexus dealer.
